

WE SUPPORT RENEWABLE ENERGY DAY AND NIGHT.

The Hawaiian Electric companies are working with Sopogy to capture the energy from an abundant natural resource...our island sunshine. Sopogy's technology at Keahole Point tracks and concentrates sunlight to produce electricity throughout the day. It can also store energy for use at night. Working together with businesses like Sopogy, we will provide clean local energy for generations to come. For more information, visit hawaiisenergyfuture.com.
